PROJECTS   06

2025

Custom Text Editor / Google Docs Clone

A featured, collaborative rich text editor application, leveraging the power of Next.js and TypeScript to deliver a modern, performant, and reliable editing experience. This was built with Next.js, TipTap, Radix UI, Convex, Clerk, Liveblock. Features include: A toolbar / rich text editing using TipTap. (bold, italic, underline, highlight, links, tables, images, tasks, headings, etc.).

2025

Real-Time Chat Application

Built a high-performance, real-time live chat application using ReactJS and NodeJS, capable of handling both secure one-on-one and scalable group messaging.

EXPERIENCE   02

04.2025 - 06.2025

Zoomers

Upgraded the platform with new features and debugged existing functionalities using PHP. Collaborated closely with web designers to ensure optimal UI/UX. Solely responsible for the portfolio feature update and optimized the sales flow in the back office.

An understanding of the user. Experience designing for responsive web platforms.
